

Course

Aviation Legislation Training

Course Description

The **Aviation Legislation Training** is an interactive state-of-the-art web-based training in accordance with EASA standards and provides employees with essential information on international aviation legislation fundamentals.

The course is designed to AICC and SCORM standards and combines rich multi-media graphics with limited use of text, audio narration and a high degree of interactive elements. Lesson Objectives and Knowledge Checks complete each individual chapter.

Target Groups

- ➔ Technical / Administrative Employees and
- ➔ Management Personnel of
 - Airlines
 - Maintenance and Overhaul Organizations
