

FTO Solutions for Flight Training Organizations

Challenges and Solutions

As a flight school in today's challenging business environment you need every advantage possible. For this reason we are now offering our **new „Blended“ Flight Training Courses**.

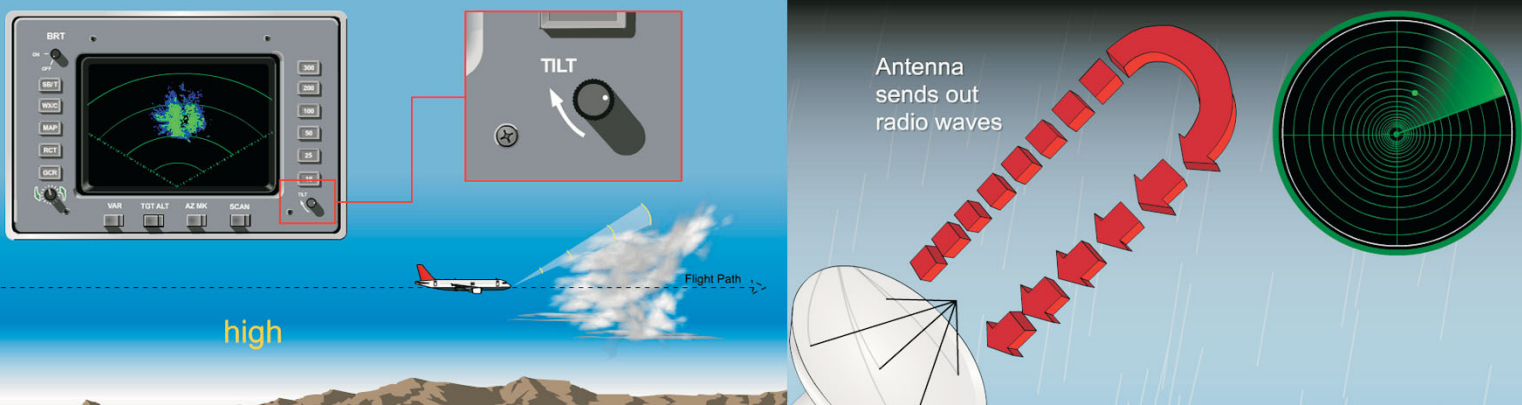

We realize that each business and each learning requirement is unique, and only a combination proven methodology and flexible working practices will ensure that your expectations are exceeded.

E-learning tools, textbooks, question banks, presentations are linked with the classroom training to form one training solution.

Course Structure

The backbone of our Courses is the **Learning Management System (LMS)** which will allow you to organize, track and document your training activities. Study progress, the total time spent, the attempts per lesson, the stage test results and the general progress of each trainee are constantly monitored and documented by the Learning Management System to the satisfaction of the authority. → **Your Quality- and Recordkeeping System**

- ➔ The **multimedia-based training** is designed to develop skills, knowledge and performance of future pilots. Visual realism and practical instructions ensure that student's retention rates increase.
- ➔ The multimedia-based training is accompanied by **text- and workbooks** containing additional practical examples and questions.
- ➔ A **question bank** to check the student's progress as well as to prepare for examinations is directly linked to the multimedia-based training.
- ➔ **Classroom Presentations** and an **Instructor Guide** will complete our training solution for your business.
- ➔ **Already available training material** of your organization will be added and implemented into the course structure.

How does it work

- ➔ We will analyze how our training solution can fit best into your organisation
- ➔ You will get access to the LMS, Classroom Presentations and the Instructor Guide
- ➔ You will get a training in how to use the courseware
- ➔ Textbooks will be customized with your Logo
- ➔ Your students purchase the training
- ➔ The course can start

The costs of the courseware arise from the number of students attending the course. No investments – but additional revenue.

Available Courses

We are proud to offer the following courses:

- *Instrument Rating (IR)*
- *Commercial Pilot (CPL)*
- *Airline Transportation Pilot (ATPL)*
- *High Performance Single Pilot*

Benefits

- ➔ High quality training material based on infoWERKs experience
- ➔ Integrated quality- and recordkeeping system
- ➔ Mobile self-paced learning possibility for students
- ➔ Scheduling flexibility
- ➔ Cost saving by reducing personnel and office expenses
- ➔ Additional revenue through the sale of learning material
- ➔ No investment
