

infoWERK LEARNING MANAGEMENT SYSTEM (i-LMS)

The core of a successful web-based training solution is the 'Learning Management System (LMS)'. infoWERK as an e-learning provider has successfully addressed the needs of its customers and developed the AICC* and SCORM** compliant infoWERK Learning Management System (i-LMS). The i-LMS is a powerful tool for administering e-learning courses.

In one system you can enroll, manage, communicate, test, track and report. In other words, the i-LMS gives you complete control and accountability of your distance-learning courses. The i-LMS takes full advantage of the power and flexibility of the web, is exceptionally easy to use and its clear, user-friendly menu structure allows quick generation of online assessments, integration of additional content and exercises as well as editing of courses in real-time thanks to module-based course structures.

SYSTEM COMPONENTS

- ➔ User Management
- ➔ Course Management
- ➔ Reports
- ➔ Asynchronous Communication
- ➔ Messages
- ➔ Chat / Discussion Forum
- ➔ Administration Tool

HIGHLIGHTS OF THE i-LMS

- ➔ Extensive communication opportunities for both synchronous and asynchronous communication (Chat, Discussion Forum, e-mail etc.)
- ➔ Automatic course generator with module-based course structures
- ➔ Ability to integrate additional content and exercises in order to provide the user with accurate and up-to-date information
- ➔ Log step features
- ➔ Statistical reports on the students' learning behaviour
- ➔ Multi-client capability
- ➔ The i-LMS supports and is in compliance with open standards, such as AICC* and SCORM**

* Aviation Industry CBT Committee

FLIGHT OPERATIONS TRAINING

infoWERK Flight Operations Training Products are designed and created by experts in the fields of Aviation, Education, Computer Science and Graphic Arts, working together to provide you with the most advanced e-learning products on the market. The comprehensive training packages are accurate, up-to-date and internet-ready. We offer you both 'off-the-shelf' training products, or training products created to meet your exact specifications and needs.

TARGET GROUPS

- ➔ Pilots
- ➔ Flight Attendants
- ➔ Dispatchers
- ➔ Operations Engineering
- ➔ Airport Personnel
- ➔ Flight Training Organisations
- ➔ Aircraft Manufacturers
- ➔ Authorities

BASIC TRAINING

A flight school in today's challenging business environment needs every advantage possible. For this reason, we are now offering new 'Blended' Flight Training Courses. We realize that each business and each learning requirement is unique, and only a combination of proven methodology and flexible working practices can ensure that your expectations are exceeded. E-learning tools, textbooks, question banks and presentations are linked with the classroom training to form a single training solution.

Available Courses:

- ➔ Instrument Rating (IR)
- ➔ Commercial Pilot (CPL)
- ➔ Airline Transportation Pilot (ATPL)
- ➔ High Performance Single Pilot

TYPE TRAINING

Developed in conjunction with the manufacturer, our web-based type training courses provide a high quality courseware package for Initial Pilot Training, Familiarisation Training, Recurrent or Refresher Training.

Available Courses:

- ➔ Dornier 328 Jet
- ➔ Dornier 328 Prop
- ➔ DHC-8-100
- ➔ DHC-8-200
- ➔ DHC-8-300
- ➔ DHC-8-300 Performance, Weight & Balance and Flight Planning
- ➔ DHC-8-400
- ➔ Embraer 145
- ➔ Embraer 145 HUD
- ➔ Embraer 145 Performance, Weight & Balance and Flight Planning

SPECIALIZED TRAINING

Developed together with highly recognized aviation specialists, this training is designed to enhance the knowledge and skills of your third party providers and your employees within the Flight Ops Department.

Available Courses:

- ➔ De-Anti Icing on the Ground
- ➔ Low Visibility Operation
- ➔ Smoke & Smell
- ➔ FMS UNS 1C Tutorial
- ➔ FMS UNS 1K Tutorial
- ➔ FMS Honeywell Embraer 145 Tutorial
- ➔ GNLU 910 Tutorial
- ➔ Dangerous Goods
- ➔ First Aid
- ➔ Recurrent Training for Flight and Cabin Crew
- ➔ Flight Operations Officer (FOO)

MAINTENANCE AND GROUND OPERATIONS TRAINING

With our many years of experience in developing web-based aviation training systems, infoWERK can offer a broad range of 'off-the-shelf' products for basic, type and specialized training for Maintenance and Ground Operations Personnel. All programs are deployable in either a traditional workstation environment or in a web-based training format for delivery over the internet.

TARGET GROUPS

- ➔ Maintenance Personnel
- ➔ Airport Personnel
- ➔ Maintenance Training Organisations
- ➔ Technical Field Representatives
- ➔ Aircraft Manufacturers
- ➔ Authorities

BASIC TRAINING

As a highly interactive courseware the basic maintenance training is performed in order to obtain

- ➔ any of the Part 66 Licenses for Airline-, Business Aviation- and General Aviation Staff

This web-based training covers all basic training requirements according to Part 66 for Category A, B1 and B2 certifying staff. The course is aimed to support airlines and aviation training colleges world-wide to deliver basic engineering training.

It is designed to be used for self-paced as well as instructor-led training. It covers the full range of aircraft systems found on the modern aircraft. Full descriptions of system components and controls are provided in a structured, easy-to-follow way to ensure that the student gains a comprehensive understanding of basic principles.

TYPE TRAINING

Developed in conjunction with the manufacturer and highly experienced airlines, our web-based type training courses provide a high quality courseware package for Initial Maintenance and Ground Handling Training, Familiarisation Training, Recurrent or Refresher Training.

Available Courses:

- ➔ Dornier 328 Jet
- ➔ DHC-8-100
- ➔ DHC-8-200
- ➔ DHC-8-300
- ➔ DHC-8-400 (1st quarter 2009)
- ➔ Embraer 145

SPECIALIZED TRAINING

Developed together with highly recognized aviation specialists, this training is targeted to enhance the knowledge and skills of your third party providers and your employees within the Maintenance and Ground Ops Department.

Available Courses:

- ➔ De-Anti Icing on the Ground
- ➔ Human Factors
- ➔ Aviation Legislation
- ➔ Smoke & Smell
- ➔ ECTM Training
- ➔ Annual Continuation Training
- ➔ Fuel Tank Safety
